

Two Upcoming Opportunities to Receive 16-hour Training on

Cognitive and Human Factors in Forensic Decision Making
Presented by: Dr. Itiel Dror

This program covers a variety of issues specifically chosen as relevant to enhance the work of forensic examiners. Each session will cover brain and cognitive issues relating to decision making. These cognitive science issues will then be connected to specific issues in forensic work. The program provides practical solutions to address these weaknesses and discusses best practices to enhance forensic practices. The program will also present and discuss the National Commission on Forensic Science (NCFS) document (“Ensuring That Forensic Analysis Is Based Upon Task-Relevant Information”) and the recommendations given by the National Academy of Sciences.

DATES: Session One- Thursday Feb 7th and Friday Feb 8th

Session Two- Monday Feb 11th and Tuesday Feb 12th

TIME: 07:00-15:30

LOCATION: Hertzberg Davis Forensic Science Center

Main Conference Room

800 Paseo Rancho Castilla

Los Angeles, CA 90032

COST: \$570 per person (Funded through LACRIS)

The Instructor: Dr. Itiel Dror works at the Center for the Forensic Sciences at University College London and is the Principal Consultant & Researcher for Cognitive Consultants International (CCI-HQ). He received his PhD in Psychology from Harvard University. Dr. Dror's specialty is in taking the most theoretical scientific understanding of the human mind, brain and cognition, and translating it into practical and tangible ways to improve human performance in real world domains. This applied research has primarily focused on enhanced cognition through training, decision-making, and use of technology. For more details, see: www.cci-hq.com
